

#### 04. In Your Head

##### Verse 1

Mind confused Nothing to lose  
Anymore door  
Shut what (whut)  
Made it this decision hey I too was wishing  
For a different ending  
Situation so damaging  
Frame to loose Miss will to reattach screws  
Stomach turns three hundred sixty learn see you all ditched me  
True colors shown mind isn't blown  
I've known  
Family? I'm not part of it Oh please don't start shit  
Acting innocent unaware answers lay right there  
Willingly blame only me see we're all casualties  
Everyone's wrong but you? Oeh...  
Self-reflection? Know the meaning? well a lesson I'm teaching  
Look into the mirror till you're bleeding  
Facing reality is hard making a start  
Would mean new ability It's too late for us three

##### Chorus:

Didn't plan this way well ok  
Cut pain at its core switch lane shut the door  
Last piece of advice open your eyes  
Don't be upset it's in your head

## Verse 2

Sick of trying to explain the pain  
Of being treated like kid right In a wheelchair I sit  
Let me visualize it better parents on top of the ladder  
While I don't get to climb to places where the sun shines  
Paid it no mind  
Until I said going to explore get to places I haven't seen before  
No help no more  
Suddenly a transition dad ignores refuses to listen  
Months pass no switching mam passively waits  
Seems to take no action together only tension  
Arrows shot in my direction  
As if I'm the issue grab a tissue  
I've grown up You two are stuck  
In the past blast  
All negativity to me in reality  
Both can't accept new me  
Fine it's ok the last words I'll say  
Wishing you the best In time let the pain rest

## Chorus:

Didn't plan this way well ok  
Cut pain at its core switch lane shut the door  
Last piece of advice open your eyes  
Don't be upset it's in your head

### Outro (speech)

All I'm saying with this track is that, I can no longer live a life that others want me to live.  
It's time I spread my wings, and make my own decision, walk my own path, even if sometimes it's wrong. At least, if you make a mistake you'll learn and get stronger. That's what I'm gonna do. If you're not with that, well so long...

### Chorus:

Didn't plan this way well ok  
Cut pain at its core switch lane shut the door  
Last piece of advice open your eyes  
Don't be upset it's in your head
